

# ATTACKING PRIVATE CORPORATION TAX PLANNING

## REINING IN TAX PLANNING FOR PRIVATE CORPORATIONS

Discover the three main areas that the Federal Government believes provide unfair tax results for Canadians who use private corporations for tax planning.

We'll discuss potential changes to income splitting with family members, perceived tax advantages achieved through the accumulation of passive investment portfolios owned in a private corporation and strategies that convert regular income or dividend income into capital gains with lower tax rates.

Join us for a complimentary information session.
